Summary

Action-oriented software engineer with 14+ years of experience and a passion for working cross-functionally to deliver results. Deep experience throughout the software development lifecycle at both B2B and B2C companies, from ground-floor startups to large enterprises. Skilled at collaborating with product managers, designers, and other engineers to build scalable, maintainable software that meets user needs and drives business outcomes.

Technical Skills

- Generative **AI development workflows** for practical software delivery, including code generation, refactoring, and debugging
- Modern API development (both REST and GraphQL) in **Java**, **Kotlin**, **Scala**, and **Python**
- Web application development with **React**, **TypeScript**, and **Tailwind CSS**
- Build and deploy automation with **GitHub Actions**, **CircleCI**, and **Docker**
- Cloud-based architecture in **AWS** including scale-to-zero deploys in **Lambda** and **API Gateway**
- Database integration and management with **PostgreSQL**, **MySQL**, **DynamoDB**, and **MongoDB**

Additional Skills

- Management experience**, leading two teams of engineers towards aggressive goals
- Ability to work efficiently in a team environment as well as independently
- Effective interpersonal and written communication skills

Other Experience

MAGIC CIRCLE[®] WEBRING

- Triplicate sister sites that crowdsource rankings for Magic: the Gathering™ cards
- Monorepo TypeScript / React frontend powering all three web applications
- AWS infrastructure deployed via TypeScript CDK v2

FUTURE.FLIP.CITY

- Tournament companion webapp for bespoke pinball events
- Syncs with Firebase updates published from organizer's iOS app in real-time

OGR4U.COM

- At-hand scouting reference for Pinball League matches
- Interactive filters allow rapid querying of machine and player data

Education

BS in Computer Science and Applied Mathematics,
Colorado School of Mines

Achievements // Awards

- National Merit Scholarship Finalist
- Northrop Grumman Corporate Sponsor Scholarship Winner

Work Experience

TRUEWORK

Senior Software Engineer (Apr 2023 – Jan 2026)

- Delivered new product features against Python monorepo and React/Typescript frontend
- Added integrations with LOS platforms, employment/income data providers, and property management systems
- Considered multiple user personas when designing and implementing features

FLOW FINANCE

Lead Engineer (Sep 2022 – Jan 2023)

Senior Software Engineer (Feb 2021 – Sep 2022)

- Developed generic platform for building and deploying Scala code to AWS Lambda
- Built data pipeline from scratch, pulling data in real time and at low cost from data providers
- Wrote backing logic for internal services, enabling bookkeepers to easily manipulate data upstream
- Mentored junior engineers on the JVM, Scala, and functional programming concepts from the ground up

CASH APP

Senior Software Engineer (Sep 2020 – Feb 2021)

- Maintained integration with Salesforce, empowering Cash App's customer support team
- Conducted discovery and solution work for handling official customer complaints via multiple input sources

ACORNS

Engineering Manager (Oct 2019 – May 2020)

Senior Software Engineer (Jul 2018 – Oct 2019)

- Maintained and refactored monolithic Scala service, responsible for managing over 1M IRAs
- Created serverless infrastructure to synchronize investment statuses across systems
- Led engineering team of nine, emphasizing individual growth and team achievements
- Reinforced adherence to Scrum principles, increasing velocity and productivity

NIKE

Senior Software Engineer (Jan 2017 – Jul 2018)

- Devised and implemented architecture for promoting search results on store.nike.com
- Crafted Elasticsearch solutions for multi-tenant needs
- Implemented and tuned search engine scoring mechanism via Apache Spark/Hive

SPORTSLABS

Senior Software Engineer (Sep 2015 – Dec 2016)

Software Engineer (Jan 2015 – Sep 2015)

- Overhauled Spring REST API servicing the college sports domain
- Devised new build/deployment mechanisms for AWS Elastic Beanstalk, driven through Bamboo
- Diagnosed and fixed MongoDB performance problems
- Mentored junior engineers to improve technical knowledge and performance

DPRA INC.

Programmer (Oct 2014 – Jan 2015)

- Maintained and upgraded fleet of Java EE applications
- Refactored legacy code, bringing it under test and making it EE container agnostic

RED ROBIN

Enterprise Developer (Mar 2014 – Aug 2014)

- Ported existing Rails application for customer loyalty program into Spring MVC
- Designed and developed backing RESTful service, written with Spring, CXF, and Hibernate
- Drafted and implemented Postgres schema for customer information

RECONDO TECHNOLOGY

Associate Software Engineer (Aug 2013 – Feb 2014)

- Parsed, normalized, and persisted customer input in a Spring/Camel based service
- Persisted medical encounter information to Postgres using Hibernate
- Developed and maintained standalone Java-based web services

FULLCONTACT

Software Development Intern (Aug 2012 – Aug 2013)

- Developed RESTful API for obtaining contact information in Grails
- Integrated Twitter and Foursquare APIs with contact management system
- Scripted exports of seeded contact data in Hadoop
